When twelve-year-old Caleb is separated from his mother during their trek north, he soon falls prey to traffickers. Enslaved in an enclave outside Manchester, the resourceful and determined Caleb never loses hope of bettering himself. After Caleb is befriended by a fellow victim of trafficking, another road opens. Hiding in the woodlands by day, guided by the stars at night, he begins a new journey--to escape to a better life, to meet someone he can trust, and to find his family. For Caleb, only one thing is certain: making his way in the world will be far more difficult than his mother imagined. Unlike other American astronauts, Virgil I. "Gus" Grissom never had the chance to publish his memoirs—save for an account of his role in the Gemini program—before the tragic launch pad fire on January 27, 1967, which took his life and those of Edward White and Roger Chaffee. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive survey of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight. Calculated Risk: The Supersonic Life and Times of Gus Grissom adds significantly to our understanding of that tumultuous period in American history. --Publisher

In the spring of 2010, Harvard Business School’s graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers.
