The principle of supremacy, or primacy, describes the relationship between EU law and national law. It says that EU law should prevail if it conflicts with national law. This ensures that EU rules are applied uniformly throughout the Union. If national laws could contradict the EU treaties or laws passed by the EU institutions, there wouldn't be this single set of rules in all member countries.

An examination of the legal framework of the EU internal market as established in the case law of the European Court of Justice, discussing in particular EC competition law, the free movement of goods, services, persons and capital and the evolution of the interpretation of the provisions. The 'State' has been retreating from direct intervention in economic life as more goods and services, the provision of which was once thought to be a 'public' responsibility, are delivered through market mechanisms. Given the need for consistent application of EC law in the internal market, a common core conception of public authority, shielded from the discipline of EC competition law, is needed. The resulting realignment of public and private functions and responsibilities is not a linear and coherent process, especially in light of the changing nature of the European legal integration project and the progressive incorporation of non-economic values in the Treaties.

This book re-examines the law governing the obligations of the Member States in the European Union from the perspective of the interests formulated and pursued by national governments in the EU. Member States' interests provide the source as well as the limitations of the obligations undertaken by the Member States in the Union. From the early days of European integration, they have determined how the law frames and defines EU obligations in the Treaties, in legislation and in the jurisprudence of the EU Court of Justice. The book neither challenges directly, nor undermines the current state of the law in the EU. Instead, it introduces a framework for interpreting and analysing legal developments - both legislative and jurisprudential - from an angle which brings the legal dimension of the membership of States in the European Union closer to its political reality. By choosing Member State interest to frame its analysis of the law, the book expresses a clear intention to explore further the interactions and the potential interconnectedness of the intergovernmentalism of EU decision-making and the normative supranationalism of the application and the enforcement of Member State obligations, in particular at the national level. Analysing how diversity among the Member States, which arises from different local interests, institutional frameworks and socio-economic arrangements, is assessed and sustained in EU legislation and in the jurisprudence of the Court of Justice, the book examines the impact of EU obligations on Member State territorial authority and territoriality. Providing a new perspective on Member State interests and European Law, the book closes the widening gap between the politics and law of European integration and between its political science and legal analysis. The book is essential reading for students and scholars in the field of state law, EU law and politics.

Since its formation the European Union has expanded beyond all expectations, and this expansion seems set to continue as more countries seek accession and the scope of EU law expands, touching more and more

aspects of its citizens' lives. The EU has never been stronger and yet it now appears to be reaching a crisis point, beset on all sides by conflict and challenges to its legitimacy. Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact. EU law, always controversial, continues to perplex, not least because it remains difficult to analyse. What is the EU? An international organization, or a federation? Should its legal concepts be measured against national standards, or another norm? The Oxford Handbook of European Union Law illuminates the richness and complexity of the debates surrounding the law and policies of the EU. Comprising eight sections, it examines how we are to conceptualize EU law; the architecture of EU law; making and administering EU law; the economic constitution and the citizen; regulation of the market place; economic, monetary, and fiscal union; the Area of Freedom, Security, and Justice; and what lies beyond the regulatory state. Each chapter summarizes, analyses, and reflects on the state of play in a given area, and suggests how it is likely to develop in the foreseeable future. Written by an international team of leading commentators, this Oxford Handbook creates a vivid and provocative tapestry of the key issues shaping the laws of the European Union.

State intervention in air transport is omnipresent. Airlines, in particular, are major beneficiaries of State aid. This book provides a comprehensive analysis of the law regulating State aids to airlines, which includes sections on Articles 107 TFEU and 108 TFEU as well as an overview of legal issues raised by air transport and competition in the EU, in particular deregulation and its consequences. EU Law on State Aid to Airlines follows a multi-disciplinary approach by relying on the fundamental concepts of economics and policy analysis. This approach allows grasping the wider implications of this sector's issues for the field of State Aid, in particular in the light of the 'more economic approach' and the 'balancing test'. Furthermore, additional perspective is given on State aid law in the air transport sector through comparative analyses of regulations in the United States and Switzerland and outlooks on international relations. Finally, the book presents a number of recent Commission decisions with a dramatic importance for the air transport, with the opening of formal investigation procedures regarding alleged State aid to low-cost airlines operating from regional airports all over Europe. Magnus Schmauch is Legal Secretary at the EFTA Court in the Chambers of judge Pall Hreinsson. Previous experience includes four years as a lawyer at the Court of Justice of the European Union. He has published a large number of articles on State aid and other fields of EU law and teaches on EU law and fundamental rights at the University of Lund, Sweden.

Rules controlling State aid and subsidies on the EU and the WTO level can have a decisive influence on both regulatory and distributive decision-making. This field of law has grown exponentially in importance and complexity over the past decades. Rules on State aid and subsidies control are one of the key instruments to ensure that public spending and regulatory measures do not lead to discriminatory distortions of competition. As a consequence, hardly any part of national law is free from review under criteria of State aid and subsidy regulation. In turn, State aid and subsidies law is linked to economic, constitutional, administrative law of the EU and the Member States as well as to public international law. This book brings together leading experts from academia, the judiciary, civil servants from the European Commission, and practicing lawyers to provide expert opinion and commentary on the diverse dimensions of the complex and vital area of law. Critically analysing and explaining developments and current approaches in State aid law and subsidies, the chapters take into account not only the legal dimensions but also the economic and political implications. They address the EU law applicable to State aid in the aftermath of the recent State Modernization reform, and coverage includes: an in-depth analysis of the notion of State aid as interpreted by the Court's cases-law and the Commission's practice; the rules on compatibility of State aid with the internal market; the rules governing the procedure before the Commission; the litigation before the Court of Justice of the European Union; and analysis of the other trade defense instruments, including WTO subsidy law and EU anti-subsidy law.
