Abstract. This paper
examines Ridley
Scot's 1982 film

Blade Runner as a
cautionary tale
relating to the role of
law in a technology
augmented
environment. Blade

Online Library Retrofitting

Runner presents a regime that uses law first in order to create beings with superior abilities and pre-determined longevity, and then to define them as non-human or non-beings, devoid of legal personhood, and thus exploitable.

Online Library Retrofitting

This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment

Online Library Retrofitting

provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically

Online Library Retrofitting

resonant creation of compelling characters and an exciting story within a credible science fiction setting.

These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss

Online Library Retrofitting

the film's
psychological and
mythic patterns,
important political
issues and the roots
of the film in Paradise

detective fiction, and
previous science
fiction cinema.

Philosophy and Blade
Runner explores
philosophical issues

in the film Blade Runner, including human nature, personhood, identity, consciousness, free will, morality, God, death, and the meaning of life. The result is a novel analysis of the greatest science fiction film of all time and a unique contribution to the

philosophy of film.

Issues In Ridley

Since its release in
1982, Ridley Scott's

Blade Runner, based

on Philip K. Dick's
novel Do Androids

Dream of Electric

Sheep?, has

remained a cult
classic through its

depiction of a

futuristic Los Angeles;

its complex, enigmatic

Online Library Retrofitting

plot; and its
underlying questions
about the nature of
human identity. The
Blade Runner
Experience: The
Legacy of a Science
Fiction Classic
examines the film in a
broad context,
examining its
relationship to the
original novel, the PC
game, the series of

Online Library Retrofitting

sequels, and the many films influenced by its style and themes. It

investigates Blade Runner online fandom and asks how the film's future city compares to the present-day Los Angeles, and it revisits the film to pose surprising new questions about its

Online Library Retrofitting

characters and their
world.

The focus of this book
is on the
epistemological and
hermeneutic
implications of data
science and artificial
intelligence for
democracy and the
Rule of Law. How do
the normative effects
of automated decision

Online Library Retrofitting

systems or the
interventions of
robotic fellow
'beings' compare to
the legal effect of
written and unwritten
law? To investigate
these questions the
book brings together
two disciplinary
perspectives rarely
combined within the
framework of one
volume. One starts

Online Library Retrofitting

from the perspective
of 'code and law'
and the other
develops from the
domain of 'law and
literature'. Integrating
original analyses of
relevant novels or
films, the authors
discuss how
computational
technologies
challenge traditional
forms of legal thought

Online Library Retrofitting

and affect the regulation of human behavior. Thus, pertinent questions are raised about the theoretical assumptions underlying both scientific and legal practice.

More than just a box office flop which entered the midnight

Online Library Retrofitting

movie circuit, Ridley Scott's 'Blade Runner' has gone on to become a cult classic which continues to inspire and influence the latest cinema releases. This book studies the legacy of the film.

First Published in
2002. Routledge is an
imprint of Taylor &

Online Library Retrofitting

Francis, an informa

Ridley Scott's Blade
Runner is widely
regarded as a
"masterpiece of
modern cinema" and
is regularly ranked as
one of the great films
of all time. Set in a
dystopian future
where the line
between human

Online Library Retrofitting

beings and
'replicants' is
blurred, the film raises
a host of philosophical
questions about what
it is to be human, the
possibility of moral
agency and freedom
in 'created' life
forms, and the
capacity of cinema to
make a genuine
contribution to our
engagement with

Online Library Retrofitting

these kinds of questions. This volume of specially commissioned chapters systematically explores and addresses these issues from a philosophical point of view. Beginning with a helpful introduction, the seven chapters examine the following

Online Library

Retrofitting

questions: How is the theme of death explored in Blade Runner and with what implications for our understanding of the human condition? What can we learn about the relationship between emotion and reason from the depiction of the 'replicants' in Blade Runner? How are

Online Library

Retrofitting

memory, empathy,
and moral agency
related in Blade
Runner? How does
the style and 'mood'
of Blade Runner bear
upon its thematic and
philosophical
significance? Is Blade
Runner a meditation
on the nature of film
itself? Including a
brief biography of the
director and a detailed

Online Library Retrofitting

list of references to other writings on the film, *Blade Runner* is essential reading for students – indeed anyone - interested in philosophy and film studies. Contributors: Colin Allen, Peter Atterton, Amy Coplan, David Davies, Berys Gaut, Stephen Mulhall, C. D. C. Reeve.

Blade Runner

This book explores what science fiction can tell us about the human condition in a technological world, with the ethical dilemmas and consequences that this entails. This book is the result of the joint efforts of scholars and scientists from various

Online Library Retrofitting

disciplines. This interdisciplinary approach sets an example for those who, like us, have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a

Online Library Retrofitting

contemporary world of technology and which ethical dilemmas it brings along. One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation, where visions of human (or even post-

Online Library Retrofitting

human) life under various scientific, technological or natural conditions that differ from our own situation can be thought through and commented upon.

Although a scholarly work, this book is also designed to be accessible to a general audience that has an interest in

Online Library Retrofitting

science fiction, as well
as to a broader
academic audience
interested in ethical
questions. And
